## SIMPLE

### EASY POOL LIGHT CONTROL

The simplicity of PLUG&PLAY provides a completely intuitive lighting experience from installation to usability.

Enjoying PLUG&PLAY is as easy as plug and play. No technical room installation work is required.

The device's design is intended for completely intuitive use. Just 6 buttons are all it takes to control the lights and color of your entire pool.

ON/OFF:  
Turn on and off  
the light

Sequence:  
Choose from 8  
pre-set sequences

Speed:  
Choose the speed  
of the sequence

Intensity (Dimming):  
Increase or decrease  
the light intensity

LED Indicator: Once the sequence, speed, and light intensity have been selected, the LED indicator shows the current position at which each of these is configured, and can be changed using the +/- buttons.

## SMART

### LIGHTING UNDER CONTROL

PLUG&PLAY concentrates high technology into a very compact design that allows us to achieve the best lighting performance in its category:

- 12 colors: cool white, warm white, yellow, orange, red, magenta, violet, bluish violet, cyan, blue, turquoise and green.
- 8 sequences, 8 speeds and intensity control.
- Wide signal range. 15 meters.
- Direct color selection.
- Colorful Feedback: the remote emits a light signal with each command.
- Points of light with improved color quality and higher light output.
- Compatible only with Plug&Play lights.

## EFFICIENT

### THE MOST RELIABLE REMOTE CONTROL

PLUG&PLAY has been designed and produced in Europe with high quality standards to offer a dazzling lighting experience accessible to everyone, thanks to its 'plug & play' installation and its extensive features. A solution that solves common connection issues due to a strong signal range without synchronization problems.
